✓ 3D Printed
Model

360 DIGITAL VISUALIZATION

A simple 360 digital file visualization of
3D rendered models using any smart
device with 99% less volume.

3D PRINTED ANATOMICAL MODELS

Patient specific 3D printed anatomical models obtained from 2D conventional CT & MRI scans. Giving the surgeon a tactile surgical planning tool.

SURGICAL PLANNING

A patient-specific 3D printed anatomical model for accurate surgical planning using one to one scale of the exact patient specific anatomical dimensions.

Surgeon can mimic and revise the surgery in a complete convenient environment.

COMPETITION

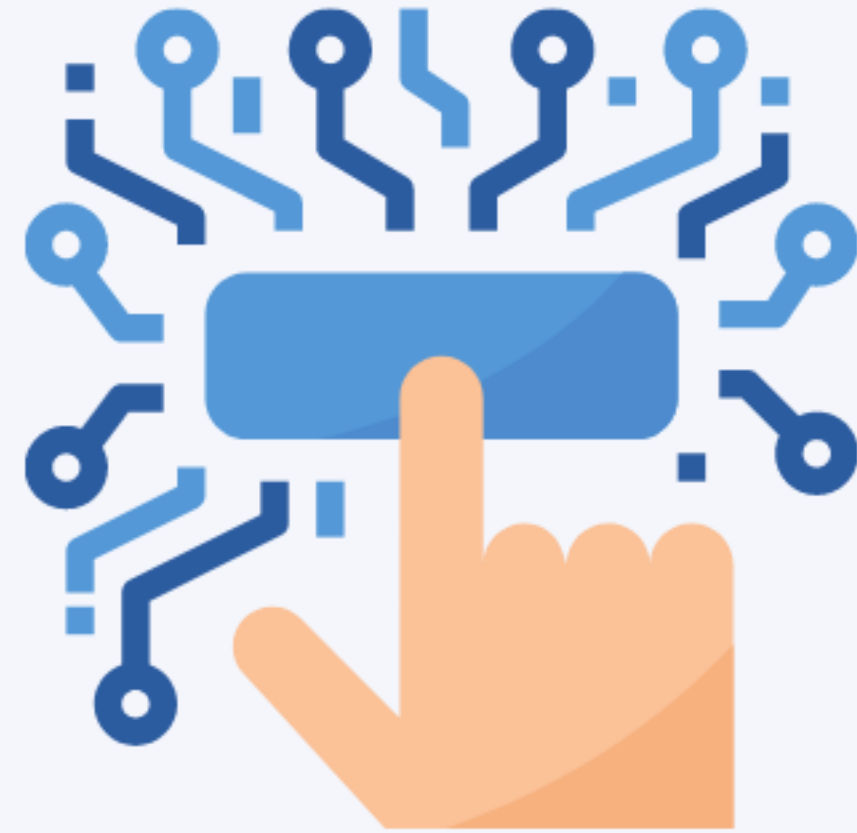

Competitive Edge

MEDICAL EXPERINCE

Medical team with experience in 3D imaging.

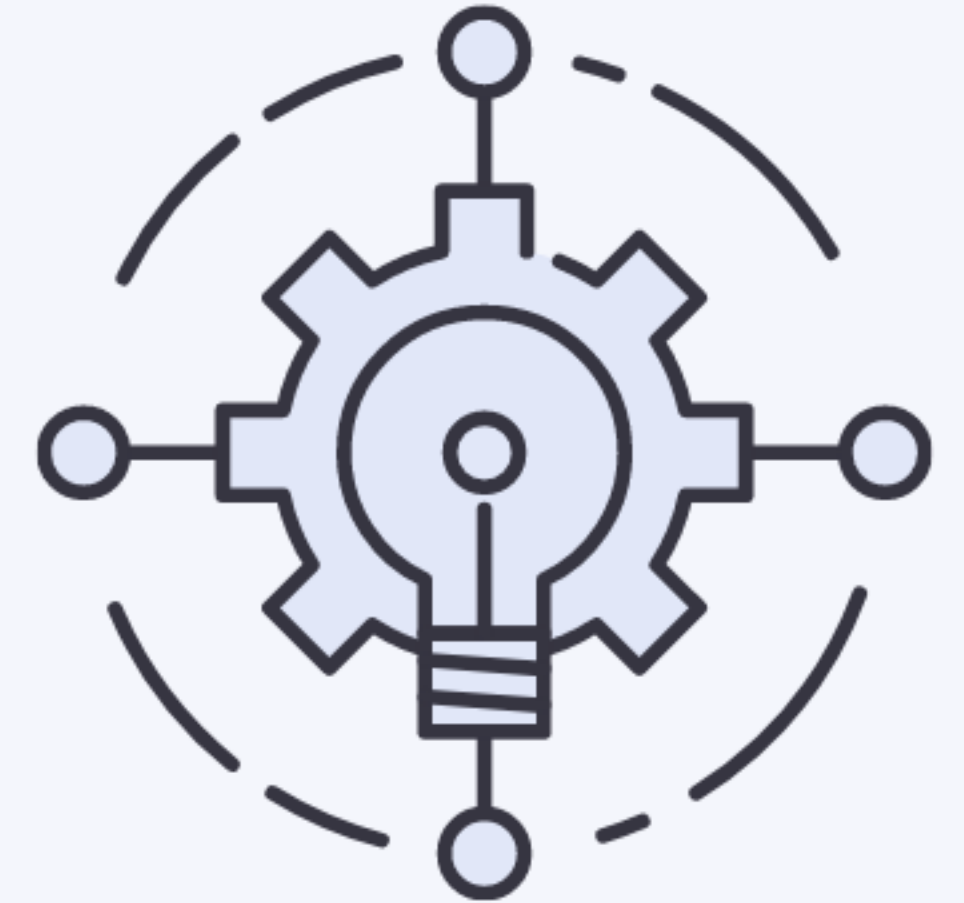

360 DIGITAL FILES

Exclusive digital service provider in the market.

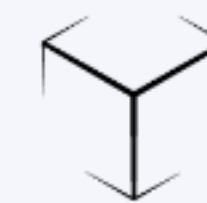

RESEARCH & DEVELOPMENT

Developing in-house A.I. aided technology.

KNOW-HOW

Product-Market fit & scalability.

Market Size

\$ 15.5 Bn

* GLOBAL HEALTHCARE 3D IMAGING

\$ 2 Bn

MEA HEALTHCARE 3D SERVICES

GO TO MARKET

PARTNERS

Establishing partnerships with radiological centers and hospitals throughout the country to cover more geographic areas and to close operational cycle

CUSTOMER ENGAGEMENT

Developing branded relationship with for our 3D printing services within medical schools followed by digital services engagement

ONE TO ONE

Direct one to one sales activities to educate the surgeons about our new services and how it will provide a value for them

PRICING

Market penetrating pricing strategy to compete the current 2D paper snapshots

Team

DR. MOSTAFA SAMIR

Cofounder & CEO

- Master's of Diagnostic Radiology
- Healthcare Management Specialist
- 10+ years of experience in Diagnostic Imaging & 3D modelling

ENG. MOHAMED HAZEM

Cofounder & CTO

- Codam College, Amsterdam
- Software Engineer
- 8+ years of experience in Digital transformation

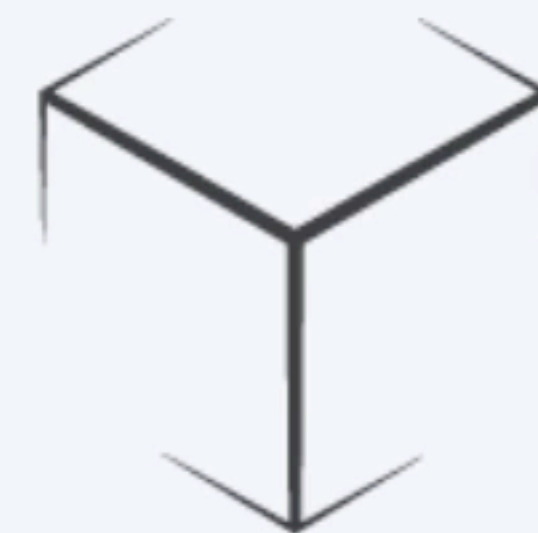

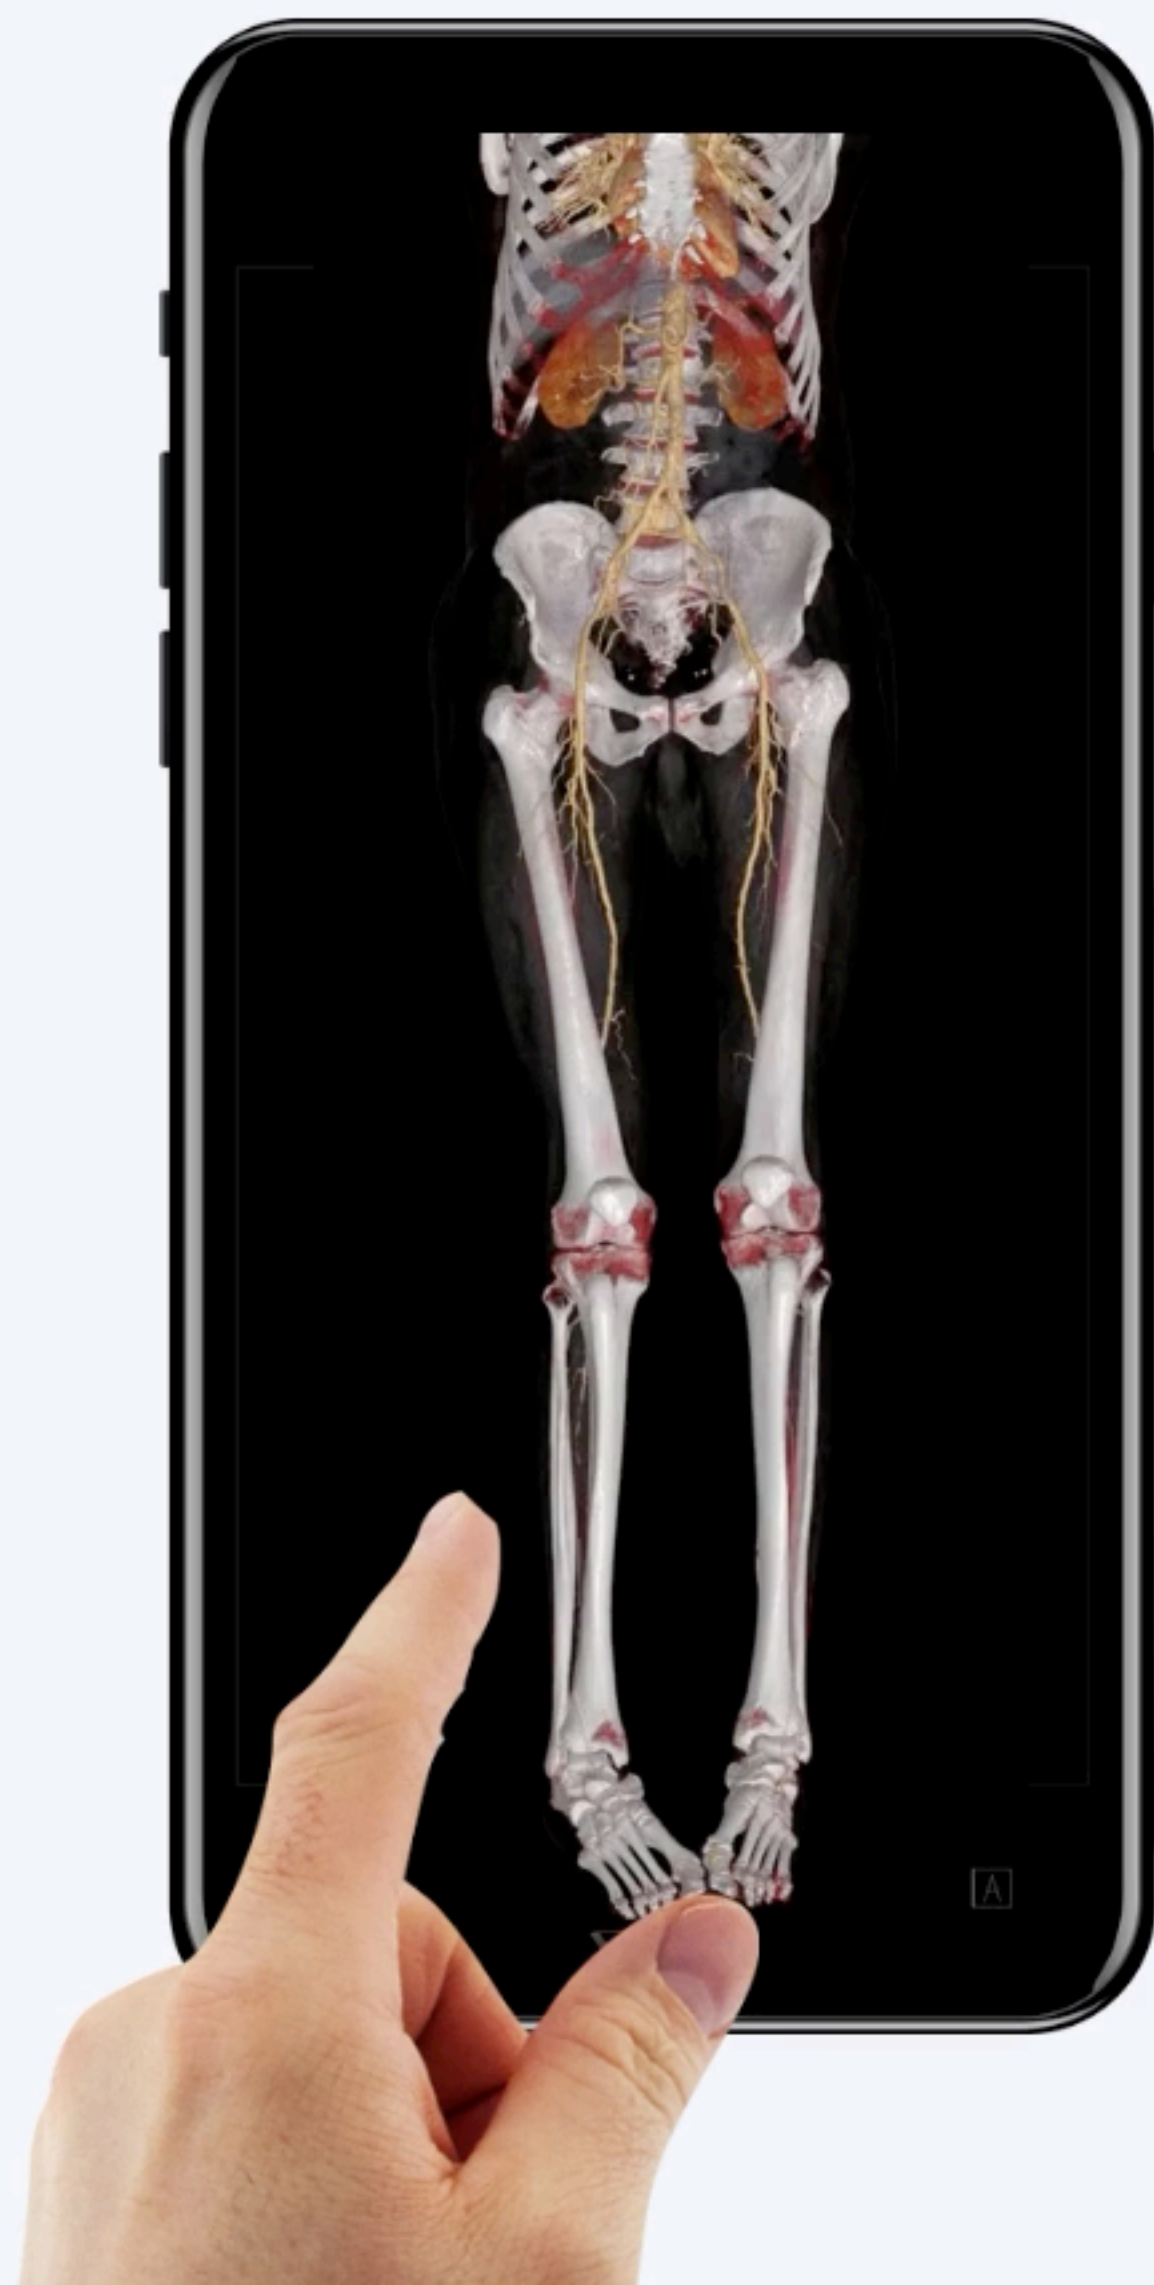

ENG. MINA MONTASER

Cofounder & COO

- Bachelor of Physics & Computer Science
- Medical Imaging Physicist
- 7+ years of experience in Medical Imaging & 3D Post-Processing
