LOCAL

Fully enabling local sellers online through data assurance

The background of the slide is a photograph of a room. On the left, there are several circular woven wall hangings in various colors. In the center, there is a white cabinet with glass doors. To the right, three straw hats are mounted on the wall. Further right, a framed poster features two stylized faces, one yellow and one grey, with the text 'AMORCITO' above and 'CORAZON' below. At the bottom right, there are some colorful bags and a coiled rope.

48%

of MENA consumers use online channels for product purchases.

BAIN & COMPANY, GOOGLE

~8%

of local retailers have an online presence.

Everyone wants to shop online, but the products are not there!

The Problem

to seller enablement

Data Accessibility

Existing platforms value *design* vs *data...why not both?*

Discovery

Discovery channels have **confusing integration requirements**

Pricing

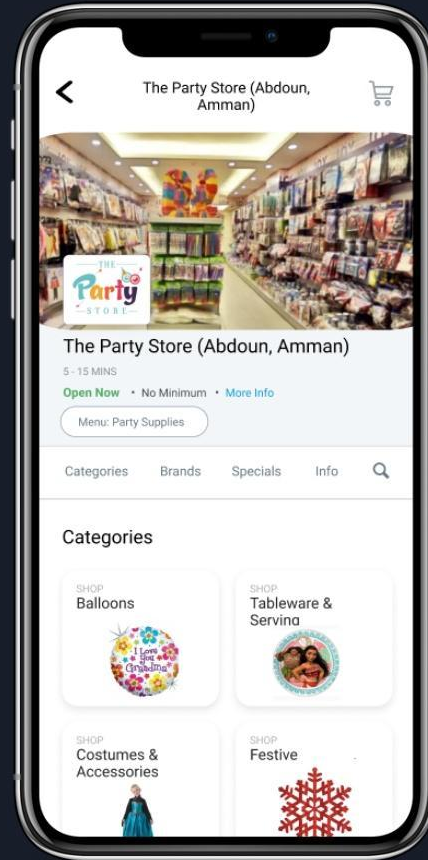

Product data enrichment and management services and **solutions are too expensive and confusing**

Introducing

Kiosq

1st solution for sellers

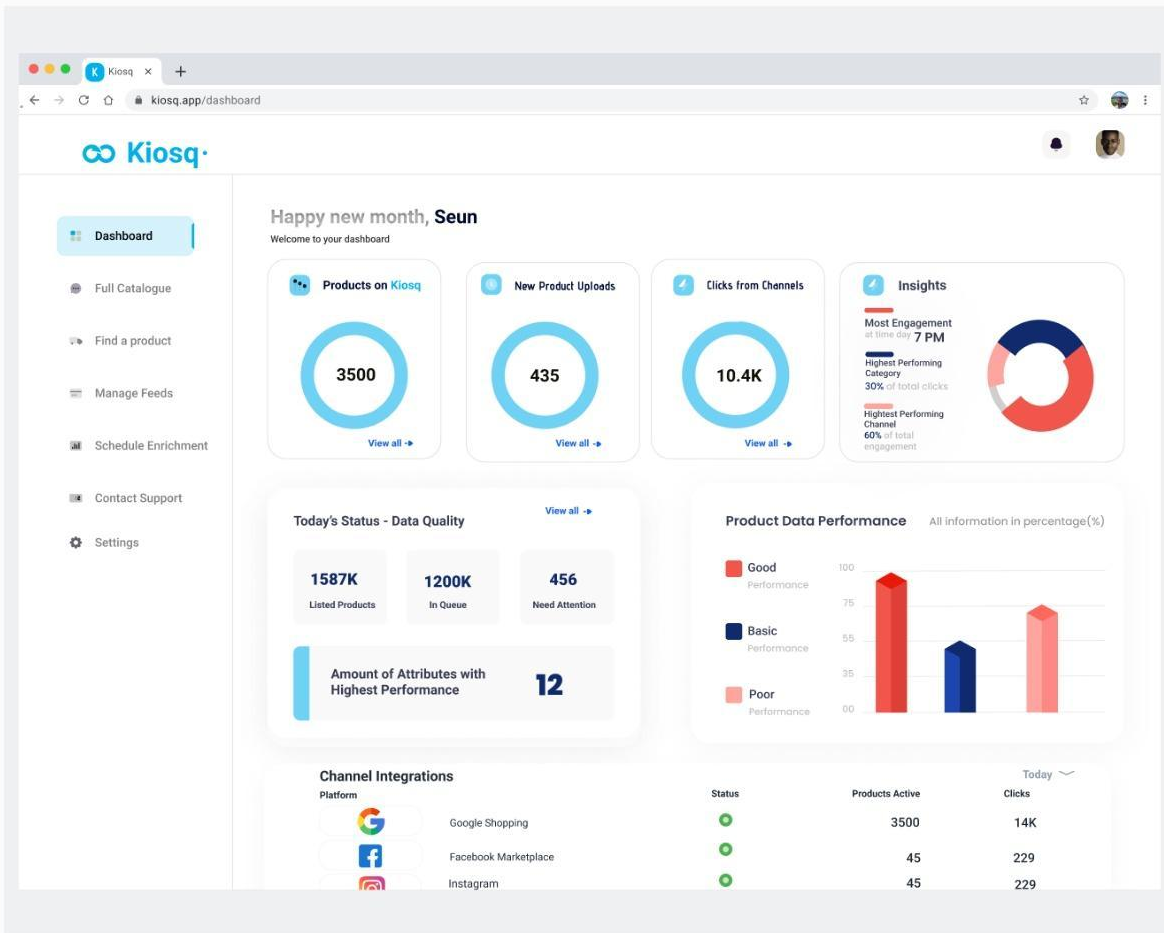

- 1 Standardized
Dynamic, simple,
online ordering
- 2 Automated product
data enrichment -
Optimum data
- 3 Fully integrated
with
multiple-channels
upon onboard

Sellers Dashboard

Elegant, Simple,
and Impactful
UI/UX

Designed for utility

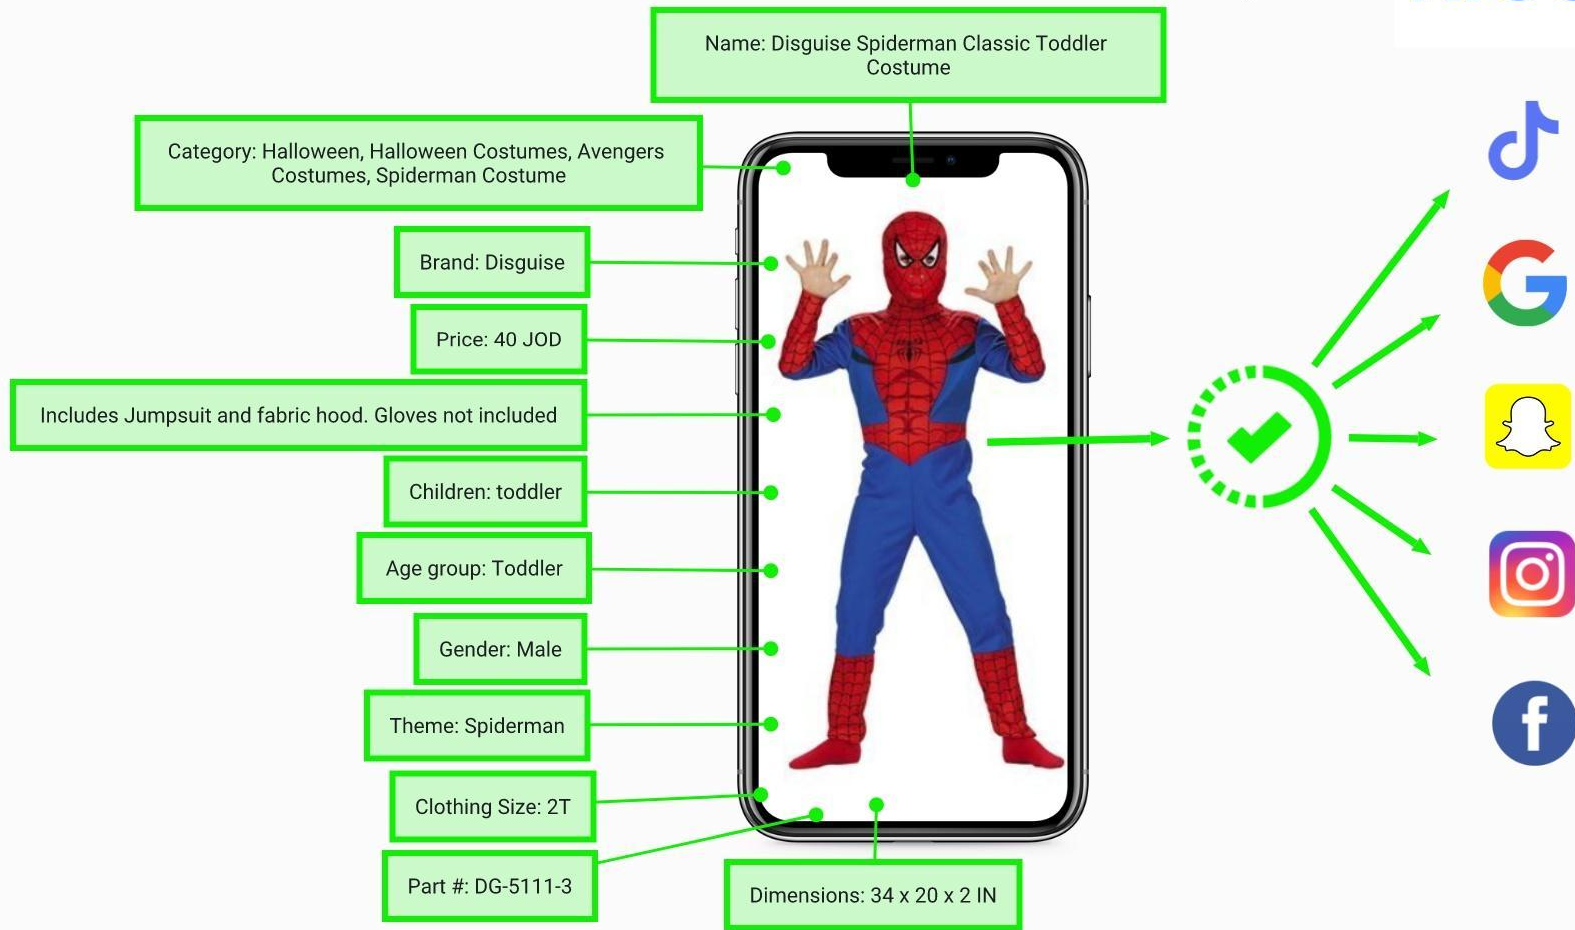

Product Data Quality without Kiosq

On an existing online store with common providers

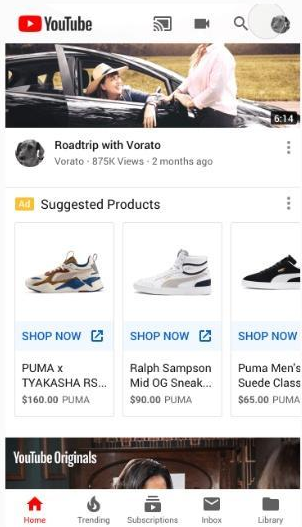

Automated Product Data Quality with **kiosq**
