

CYCLE 2 IN ABU AHABI

INVESTOR BRIEF

Flat6Labs Ignite Program in Abu Dhabi was launched in March 2021 in partnership with ADQ's DistruptAD. The second cycle took off on December 5th 2021. The outstanding graduating cohort has products and services across multiple sectors including EdTech, HealthTech, Cybersecurity, Real Estate, Construction, Sustainability, Automotive and Sports Engagement.

Flat6Labs Seed Program brought in multiple world class consultants, coaches and mentors to work closely with each of the startup teams, empowering them to achieve their business goals. Every week Flat6Labs facilitated networking opportunities to help the startups build and grow their networks and connect to global leaders.

The nine startup teams have been working over the past three months on growing their customer base, refining their offerings, expanding to new markets and building strategic partnerships.

Geek Express is an online school providing K-12 children in MENA with accredited coding skills through a gamified learning platform.

www.geekexpress.com

COMPANY BRIEF

Geek Express is an Ed-tech startup enabling K-12 MENA students with technology skills through online live classes with Arab-speaking teachers, accredited and project-based curriculums, and a proprietary gamified learning management system. Ecosystem of Multifamily Real Estate Digital Twins.

www.ibtikaroom.com

COMPANY BRIEF

Ibtikaroom has developed a centralized ecosystem of Multifamily Real Estate Digital Twins with the ability to link them with other participants in the real estate market such as:

- construction companies and real estate developers
- DIY and furniture stores
- Architecture and design firms

Unlike existing solutions, Ibtikaroom do not use human intervention or any special equipment to create a digital twin.

PRODUCT

We create digital twins for all real estate ongoing projects online and integrate them into participant's websites as a widget linking them with design studios to provide a new opportunity for customers making a decision in buying property.

We also collect data about the customer in order to form a digital profile for forming targeted offers.

TARGET MARKET

Real Estate developers, DIY and furnishing stores, property portals, design studios

BUSINESS MODEL

We charge real estate developers per sq.m of ongoing projects, diy\ furnishing stores on CPC basis by integrating our widget and providing access to our database.

Nadeera is a social enterprise that provides resident-centric, technology-enabled waste management solutions.

www.nadeera.org

COMPANY BRIEF

Nadeera is a social enterprise with objectives to promote sorting-at-source, increase the sustainability of the waste value chain, introduce technologically innovative methods to improve resident behaviors towards waste management, and establish deposit return systems for recyclables in the MENA region. Nadeera has two fully operational products that cater to the needs of municipal and property managers and the general public.

PRODUCT

We have two functioning products. The first is called “Nadeera”, an anonymous IoT tracking system that allows us to send feedback to users reflective of the quality of their sorting. Residents and businesses that sort well are rewarded with exchangeable points. Our second product “Yalla Return” is a trash-4-cash offering that allows users to trade their recyclables for monetary rewards.

TARGET MARKET

Residents and municipal and property managers in the MENA region, an area that continues to lag behind in terms of waste management and sustainability.

BUSINESS MODEL

Our business model mainly operates as an SaaS. Revenues from recyclable material would cover the costs associated with operations and profits are distributed onto stakeholders.
